

Snapshot of Mongolia's Green Economy

The GE transition issues

According to the **Green Economy Barometer 2018** report, Mongolia's progress towards a green economy is ranked as **3 out of 10.**

Mongolia's biggest challenges moving forward:

Increasing urbanization as evidenced by urban shift

Gap between official narrative and actual implementation

Knowledge gap

Inequality and poverty

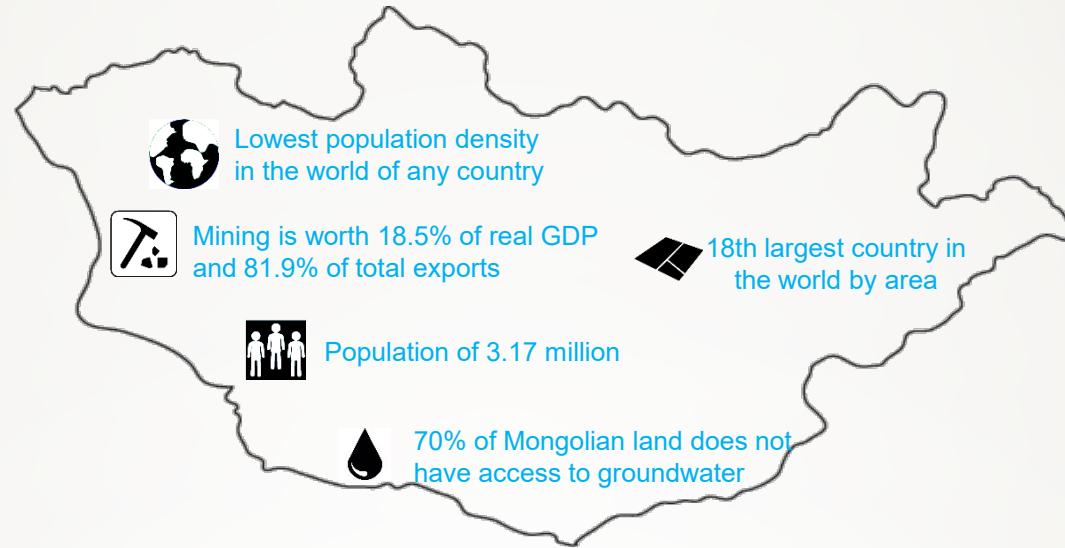

Water mismanagement and pollution

Air Pollution

Land degradation and desertification

GOVERNMENT

- ✓ National Green Development Policy to advance development in an environmentally sustainable manner.
- ✓ Tax exemptions for renewables
- ✓ Sustainable Development Vision 2030.
- ✓ 5 provinces aiming to become model green provinces.

PRIVATE SECTOR

- ✓ Mongolian Bankers' Association organizing annual Mongolian Sustainable Finance Forum.
- ✓ Xacbank became an Accredited Entity of the Green Climate Fund to finance low-carbon initiatives
- ✓ 5 wind farms, 4 hydropower stations, 3 solar farms are currently operating.

Who is doing what?

INT. COLLABORATIONS

- ✓ The first UN PAGE country.
- ✓ GGGI support the Government's green development targets
- ✓ A member of Green Climate Fund
- ✓ The EU Switch Asia Programme funding green projects
- ✓ ADB will finance to transform 'Ger' areas in Ulaanbaatar into low-carbon eco-districts.

CIVIL SOCIETY

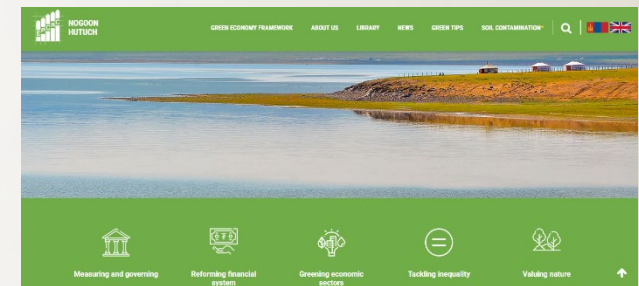

- ✓ Mothers and fathers anti-pollution movement
- ✓ "Let's change our toilets" movement
- ✓ Facebook groups on environmental awareness and green economy

What is EPCRC doing?

Organized a workshop on current situation of green economy in Mongolia and citizens' role and issues

Launched the local online green economy hub nagoonhutuch.mn

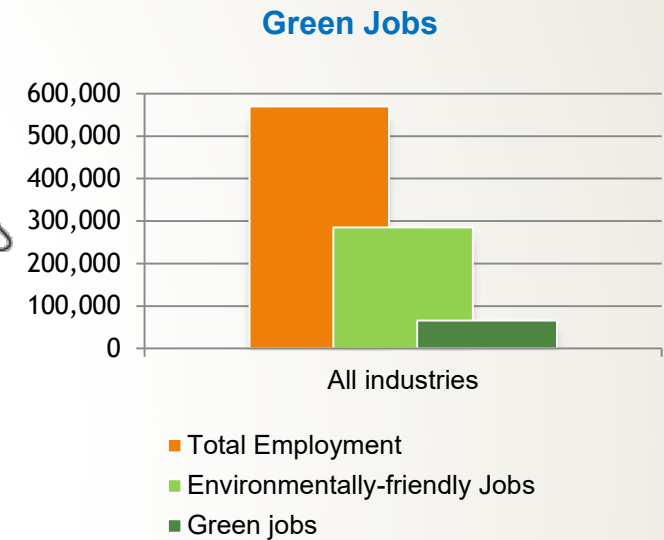

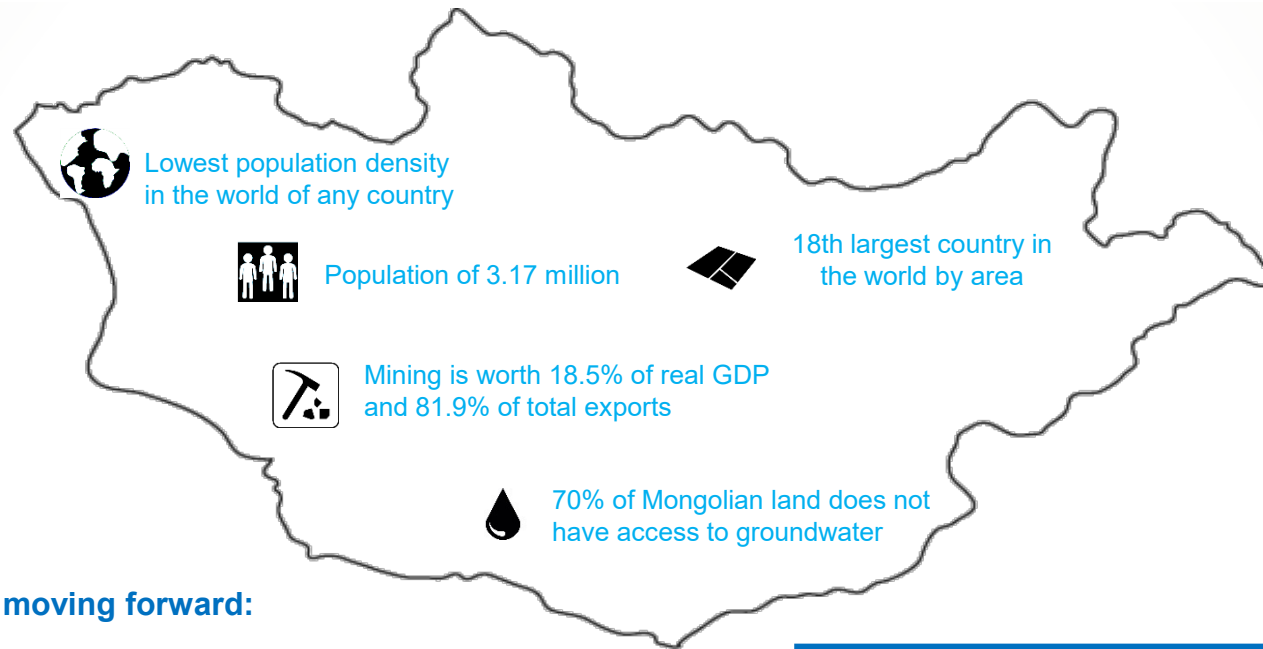

Currently carrying out "Ger" District Mapping Study to identify challenges "Ger" residents are facing: interviewed 72 households

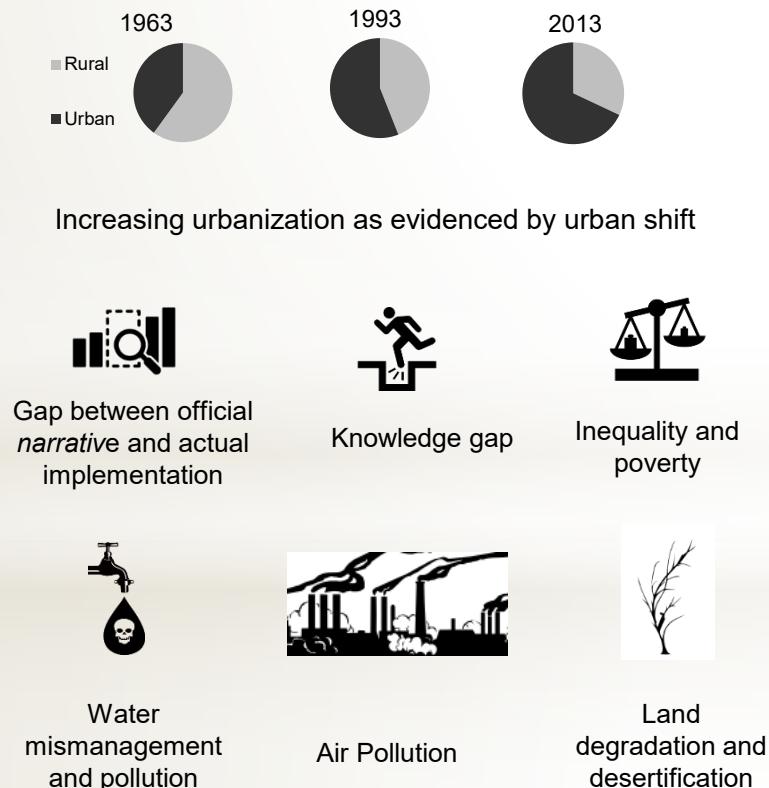

Snapshot of Mongolia's Green Economy

According to the **Green Economy Barometer 2018** report, Mongolia's progress towards a green economy is ranked as **3 out of 10**.
